POINT ANNE

# I appeal to you on behalf of the car ahead It carries a happy little family—treat them as

though they were your friends—they are nice people . . .

WHEN YOU AND I talk about other motor-ists we usually mean the car ahead but I wonder if we ever stop to realize who is in that car. Probably people just like ourselves who are deserving of every Courtesy which we can extend to them. People who will appreciate same way towards us.

So when motoring on the holiday, I appeal to you to think kindly of the people in the car ahead.

TRY COURTESY IT WORKS OTH WAYS  If you wish to pass them, give your horn a cheerful toot and give them a wide berth as well. If they wish to slow down or turn off the road, give them a "break".

• If they have just overtaken you, because they prefer to drive more quickly, refrain from racing or otherwise inconventioning them.
• If there is a car following w. remember that to it is a car following the property of the pro

show to yee.

In other words, "Try Courtesy" on the holiday in all your driving and thus do your part to help yourself and other motorists enjoy a holiday free of accidents—"A holiday free of accidents—what a grand heading that would be for Tuesday's newspapers. Do your bit and "Try Courtesy". It is the new spirit of the road.

### IT COSTS YOU NOTHING to be COURTEOUS to other motorists

I ASK YOU to please remember, as you hurry along the highways bound for some distant point, that it costs you nothing to be courteous to other drivers and it saves you money.

- It costs you nothing to sound your horn on the highway as you are about to overtake a fellow motorist and it may prevent an accident and thereby save you money.
- It costs you nothing to give the other fellow a wide berth when you meet him and it may prevent a side-swipe and thereby save you money.
- It costs you nothing to hand-signal your intention to slow down, turn or stop and it may prevent a collision and thereby save you money.
- It costs you nothing to "nip" along at the speed of the traffic you are in and it prevents other motorists from having to "cut-in" in order to get "there" and thereby removes one of the greatest causes of costly accidents.
- accidents of costs accidents.

  It costs you nothing to be courteous and considerate
  of your companions of the road and it will prevent
  accidents and thereby save dollars and cents for
  everybody and prevent broken bones and broken
  hearts as well.

So I appeal to you from the standpoint of sit economy to be courteous to other motorists on

The Whole Truth and Nothing-but "Truth in advertising," said Mr. Picobac of Essex County "is stronger than fiction, a danged sight stronger."

The occasion of this sage deliverance was an old poster on the wall of the driving-shot-garage of the Grand Central Hotel calling public attention to the "largest and fastest three-tinged circum in the world".

"We don't need circus talk to advertise Picobac smokin tobacco", declared he. "Picobac is a select Burley ... growr right ... . cured right ... and natured right. We doo't claim it's the best tobacco in the world. We haven't trice 'em all. But we DO claim that Picobac is the pick of Camada't Burley crop — and a mild ... cool , ... sweet smoke".

### WANDER THIRST

Beyond the East the sunrise; beyond the west the sea.

And East and West the wander-thirst
that will not let me be;
It works in me like madness to bid me say
good-bye.

For the seas call, and the stars call, and
oht the call of the sky!

I know not where the white road runs, nor what the blue hills are, But a man can have the sun for friend, and for his guide a star; And there's no end of voyaging when once the province call, and the road calls, and oh! the call of a bird!

Yonder the long horizon lies, and there by night and day. The old ships draw to home again, the young ships sall away. And come I may, but go I must, and it men ask you why. You may put the blame on the stars and the sun, and the white road and the aky.

The regetable display was not as large as usual owing to the drought con-ditions in the growing months, but the flowers were never loveller, nor more varied, the late autumn seamore varied, the lake autumn sea-son greatly aiding this particular feature of the Pair. Home cooking that would be the envy of exper-lenced homemakers, delicious candy,

well done art work and sewing were also included.

KING TO RETURN AT END OF WEEK

M.E. A Personal Word

For the past II 'days in my five-minute talks on Cana-dian mining I have deliberately and sincerely pointed out the many pitfalls put in the way of the investor by the wiles of the financial racketeer.

of the financial reactorer.

Read on the first presented and the plans outlined in
this series of talks, I have gone still further and have de-veloped the present plan of financing that effinancial tall the pillalls previously mentioned . . . and eliminates the ex-cessive cost of hep mailing campiages and the experient and multitudinous literature . . . I have eliminated even-tude to the control of the control of the control of the venter of the high-pressure saleman and that the re-port distance templote eath (which make investor and so, often for out of the fundamental control of the control of the eventer and the control of the control of the control of the eventer and so, often distance telephone calls (which nammary and to be for out of the funds invested by the investor and so, only a very few cents of the investors' dollar ever act reached the mining property).

By my plan, 80% of each dollar invested ACTUALLY GOES INTO THE WORK OF MINING and is used ex-clusively FOR THE FURPOSE OF DEVELOPING THE PROPERTY . . . which to begin with must show genuine indications of future possibilities under proper development.

I have selected therefore the treasury shares of ENSIGN OOLD MINES LIMITED for offering under this plan. You will not receive any high-pressure solicitation to buy shares in this enterprise. . but on the basis of the facts presented YOU CAN SPECULATE ONLY \$50.00 at this time . . . and no more until after your selected independent engineer has reported on the minewise possibilities of the company's property to you. For this \$50.00 you will receive 50 shares property to you. For this 50000 you and, in addition of the treasury stock of the Company . . . and, in addition you will also receive a definite and legal option on the un subscribed portion, if any, of Ensign shares allocated property of the subscribed portion of the subscribed portion. subscribed portion, if any, of Ensign snares allocated pro-portionately among all shareholders, but limited, however, to a maximum of 200 shares to each subscriber . . . said option to be in effect for a period of ten days after the mailing of the engineers' report by the Trust Company to you.

If you believe in my sincerity: . . . If you believe I have given you a true picture of the dangers of the financial racketers . . . and have given you a negularly true picture of the profit possibilities in participating in a GENUINE effort in mine-making, I want you with us in this sincere effort in mine-making, I want you with us in this sincere effort in develop a property that certainly looks worth

Read the FACTS about Ensign Gold Mines Limit printed alongside this message . . . then fill in and mail the subscription form provided below with your fifty dollars as sussemption form promotes seem with your firty collars this is the only way in which you can secure participath in what I believe to be a worth-while speculation with re-profit possibilities in a sincere and genuine effort in min

ANOTHER REDUCTION IN

LONG DISTANCE RATES

On calls to points over 130 miles Once again we have cut the cost of Long Distance. On September 1st, a new schedule of rates became effective on calls (both person-to-person and station-to-station) to points over 130 miles distant. This reduction will mean

an annual saving of over \$200,000.00 to telephone users in Ontario and Quebec alone. This is the second time this year that Long Distance costs Into it is no second time that year that long distance coses have been reddened. In the past seven years, we have made as substantial rate revisions. At the same time we have constantly improved service, as evidenced by the fact that, while in 1929 it took an average of 3.4 minutes to complete a Long Distance call, to-day the average is only 78 seconds.

A Word With You ...

If you haven't read the series "Five Minute Talks on Canadian Mining"... well, you've missed something. If you have read these frank discussions you know how carefully I have analyzed the profit possibilities in Canadian Mining as well as the causes of loss. This is, of course, quite a contrast to the usual percentage of public funds that actually reach the work of mine development. Many, many companies find that only a few cents of the investor's dollar is actually available for mining purposes.

I am as certain as I can be that the Ensign Gold Mines Limited thus offers more than an ordinary speculation even without the unusual investor safeguards I have insisted be
